

We recently had a major clog in one of the Venice Bay Park sewers/lift stations. It was due to an excessive amount of wipes being flushed through the toilets.

Effective immediately, we ask that you not flush the following products through the sewer system; instead please discard them in your trash receptacle.

- Wipes (even if they say they are flushable)
- Paper towels
- Kleenex/tissues
- Cotton balls or other cotton products
- Q-Tips
- Dental Floss

*The expense of future clogs due to flushing products such as these through the sewer system could be placed on the homeowner.*

Thank you!
